

# FOME-COR®

The original graphic arts foam board with a reputation for performance

## THE PAPER-FACED FOAM BOARD COLLECTION

- **FOME-COR®** has been the industry's leading paper-faced foam board for more than 40+ years. It is comprised of extruded polystyrene foam with clay-coated white or black paper facers.
- **FOAM-X® RECOVERY** is comprised of "memory retaining" polystyrene foam with clay-coated paper facers.
- **FOME-COR JETMOUNT** is comprised of denser extruded polystyrene foam with clay-coated paper facers.
- **FOME-COR CANVAS** is comprised of polystyrene foam with an embossed "canvas-like" clay-coated paper facer on both sides.
- **FOME-COR HEAT-ACTIVATED** is comprised of extruded polystyrene foam with clay-coated paper facers, one of which is covered with heat-activated adhesive.
- **FOME-COR SELF-ADHESIVE** is comprised of extruded polystyrene foam with clay-coated paper facers, one of which is covered with pressure sensitive adhesive. Simply peel back the release facer as you position the graphic on the sticky surface.
- **FOME-COR VALUBOARD™** is comprised of extruded polystyrene foam with natural kraft facers.
- **FOME-COR ACID-FREE** is comprised of extruded polystyrene foam with acid-free paper facers that meet Library of Congress standards for conservation framing.

## WHY CHOOSE FOME-COR?

- The original graphic arts foam board with a great reputation for performance
- Perfect for die cutting with a compressed edge that stays closed
- Quick service on cut-to-size orders including large sheets up to 8'x10'
- Uniquely embossable for 3-D effect displays
- Cuts easily and cleanly, even by hand
- Extremely lightweight
- Well-suited for screen printing or digital printing applications

## WHY CHOOSE FOAM-X RECOVERY?

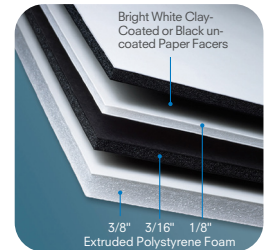

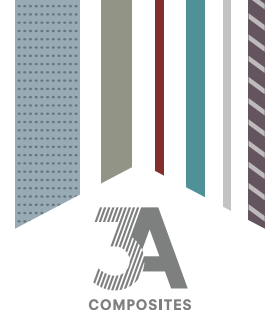

- Memory core is more resistant to denting
- Edges remain open when die cut
- Economical alternative to competitive foam boards

## WHY CHOOSE FOME-COR JETMOUNT?

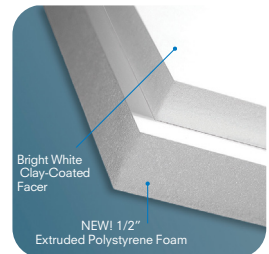

- The denser foam core provides increased rigidity and warp resistance
- Great for more demanding mounting jobs such as display, signage and framing

## WHY CHOOSE FOME-COR CANVAS?

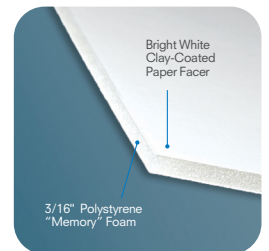

- Deep embossed texture that creates a more artistic look
- Prints and cuts the same as traditional FOME-COR
- Economical alternative to competitive canvas-like products

# FOME-COR®

The original graphic arts foam board with a reputation for performance.

## WHY CHOOSE FOME-COR HEAT-ACTIVATED?

- Eliminates the use of hot melt tissue stock
- The adhesive is activated with low temperature settings for a quick, damage-free mount
- Can be used on a heated mechanical or vacuum dry mount press, or with a heated roller laminator

## WHY CHOOSE FOME-COR SELF-ADHESIVE?

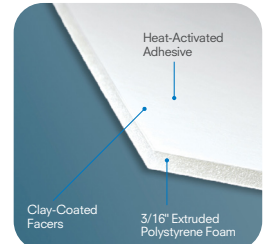

- Eliminates the use of pressure-sensitive adhesive stock
- Release facer peels back to reveal adhesive for fast and easy mounting
- Repositionable low-tack (LT) is well suited for hand-mounting methods (Blue release facer)
- Permanent bonding high-tack (HT) is pressure-activated and ideal for high volume, automated mounting methods (Red release facer)

## WHY CHOOSE FOME-COR VALUBOARD?

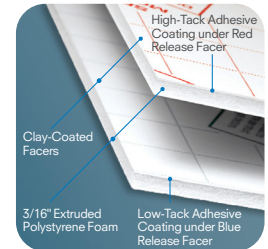

- A cost-effective alternative to corrugated cardboard
- Provides a smooth surface for mounting with no flute marks

## WHY CHOOSE FOME-COR ACID-FREE?

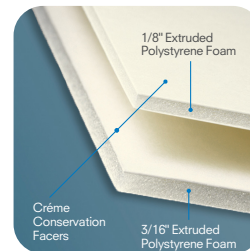

- Paper facers meet Library of Congress standards for conservation framing
- Perfect for the archival preservation of valuable art and photographs
- No additional backing is required, saving time and framing materials
