

# SINTRA®

The superior expanded PVC board engineered to go beyond

As the original expanded PVC board for the display & graphics industry, SINTRA provides a premium bright white surface with a low gloss satin finish for high quality printing results, as well as superior durability and machinability for more demanding applications. SINTRA products are comprised of moderately expanded polyvinyl chloride (PVC) in a homogeneous sheet with a low gloss satin finish.

## SINTRA | Engineered To Go Beyond

- Expanded PVC in a homogeneous sheet with a low-gloss satin finish, SINTRA is the brightest, whitest and most consistent PVC board on the market
- Premium bright white surface provides outstanding printing results (on both sides!)
- Superior dent and scratch resistance
- Good chemical resistance - can be easily cleaned and sanitized
- Lightweight yet rigid and durable
- Class A (ASTM E-84) in 3mm and less
- Easy machinability - can be formed into different shapes using wood & foam board fabrication techniques

## NEW! SINTRA XT | Extra Thick PVC Ideal for Exterior & Extended Use

- 19mm & 25mm gauge for outdoor signage, dimensional lettering, & more demanding applications
- Smooth, hard surface optimized for thick gauge product & application requirements
- High-quality, consistent surface ideal for exterior, direct print applications
- Excellent screw & nail retention

## SINTRA ECLIPSE | The New Black

- Comprised of a solid bright white PVC facer over black SINTRA
- The premium, bright white solid PVC facer of SINTRA ECLIPSE allows for enhanced printing capabilities with standard black SINTRA
- Eliminates the need for laminating or flood coating
- Maintains superior properties & fabrication of standard SINTRA

## SINTRA VERS | Expanding Versatility

- Comprised of a lighter weight, moderately expanded PVC board with a low-gloss satin finish
- Versatile general purpose expanded PVC board for a wide range of display applications
- The market standard for expanded PVC
- Very good digital & screen printing results (two sided)
- Excellent dent and scratch resistance
- Lighter weight for easy handling and installation
- Ideal for quick-turn, high volume projects
- Class A (ASTM E-84) in 5mm and less

## SINTRA CONSTRUCT | Building on Quality

- Comprised of a moderately expanded PVC board created for mechanical assembly and fabrication applications
- Very good impact strength and scratch resistance
- Easily machined & fabricated - provides necessary staple & screw retention
- High resistant to moisture absorption - no rotting or delamination
- Lightweight yet extremely rigid and durable
- Heat formable and chemical resistant
- Can be formed into different shapes using wood and foam board fabrication techniques
