# **ALUCOBOND® PLUS**

GIVING SHAPE TO GREAT IDEAS

As the original "aluminum composite material," ALUCOBOND PLUS consists of two sheets of smooth .020" aluminum thermobonded to a solid, fire retardant core and has been developed exclusively to allow architects and designers to meet today's fire performance requirements set by the International Building Code (IBC) while using ACM as the material of choice. Proven product properties and benefits of ALUCOBOND PLUS include:

- Flatness & Rigidity
- Formability
- Durability
- Ease of fabrication
- Ability to be perforated
- Wide range of colors & finishes

The versatile characteristics of ALUCOBOND PLUS provide for a plethora of applications such as exterior and interior cladding, column covers, canopies, soffits and even signage, allowing architects to offer inspiring, creative, and innovative designs while meeting the standards of sustainable planning.

ALUCOBOND PLUS is available in all of our current finishes and custom colors.

# PRODUCT DESCRIPTION

## **MATERIAL COMPOSITION**

- Aluminum interior and exterior facings in 0.020" nominal thickness
- 4mm total nominal thickness, including proprietary fire retardant core

# **SHEET WIDTHS**

- Standard coil-coated width of 62"\*
  - \*Some finishes are stocked in 40", 49.2" or 50". Please refer to stock material list
- Custom widths of 40" and 50" available on request

#### SHEET LENGTHS

- Standard coil-coated length of 196"
- Reflect Mirror is offered in 146"
- Custom lengths for coil coating: maximum 400"
- Custom lengths for anodized: maximum 216"

# MINIMUM BENDING RADIUS

- The minimum bending radius of ALUCOBOND PLUS without routing the interior skin is 15 times the thickness
- The minimum bending radius for 4mm ALUCOBOND PLUS material without routing the back skin is  $4^{\prime\prime}$

# MANUFACTURING

- ALUCOBOND PLUS is made in Benton, Kentucky USA

# **TECHNICAL SUMMARY**

# TEMPERATURE RESISTANCE

- Withstands environmental temperature changes from -55°F to +180°F
- Coefficient of linear expansion is governed by the aluminum sheet

# TECHNICAL PROPERTIES

- Nominal thickness: 4mm

- Nominal weight: 1.56 lb/ft²

- Moment of intertia: .000212 in⁴/in

- Section of modulus: .00275 in³/in

- Rigidity: 2143 lb-in²/in

## SUSTAINABILITY DESIGN

- LEED 3
- LEED v4/4.1
  - LCA Industry Standard
  - EPD Industry Standard

# **ACCEPTED EVALUATION REPORTS**

- ICC-ES: 1185
- Florida Product Approval: FL29842
- Miami Dade County NOA: 15-0923.03
- Los Angeles Research Report: 24868
- Underwriters Laboratory: 19980

# WALL ASSEMBLY FIRE TESTING

- CAN/ULC S134\*\*
- NFPA 285\*\*
