

Care & Conserve™

3A Composites USA has intensified its efforts to ensure that the company's ecological footprints are small and green through a new *Care & Conserve™* sustainability initiative, which assesses the company's entire supply chain from raw materials to disposal.

People + Planet

Reducing ♻️ Reusing ♻️ Recycling

Questions to Consider:

- ♻️ Does your substrate provider utilize sustainable vendors and raw material suppliers?
- ♻️ Is your substrate provider implementing best practices to limit resource consumption and reducing waste?
- ♻️ Does your distribution partner offer substrates with "Green" benefits such as recycled content?
- ♻️ Is your substrate provider bringing any new ideas to you about sustainable design practices?
- ♻️ Do you have the right substrate for your Retail signage or POP campaign?

The *Care and Conserve* program is described in a new four-page brochure that details the environmental initiatives being taken by 3A Composites USA. Request a copy from your sales representative to learn about the company's commitment to reducing, reusing, and recycling from both an operations and product perspective.
