GATOR-PLY® HP

The high performance backer for both three-ply and five-ply panel construction

GATOR-PLY® HP are high performance, wood-fiber veneer backers specially engineered using a proprietary resin system for successful balancing in both three- and five-ply panel constructions for the furniture and display fixture industries. Developed for improved overall performance and a low Water Vapor Transmissions Rate (WVTR), the sealed surface of GATOR-PLY HP backers provide enhanced product handling when used to back HPL faced panel construction.

WHY CHOOSE GATOR-PLY HP?
• Very low WVTR - Class III Vapor Permeability Rating
• Sealed surface provides improved cleanability & stain resistance
• Increased overall sheet strength
• Balances HPL laminates and prevents them from warping
• Convenient to use! Accomodates all standard lay-up, trimming & shaping operations in the furniture/cabinetry industry
• Suitable for both 3-ply and 5-ply panel constructions
• GREENGUARD Gold Certified
• FSC® Certified (FSC-C074317)
• Short lead times

• .026” Dark Brown & Black
• Standard widths: 31”, 37”, 49”, 61”
• Standard lengths: 97”, 121”, 145”

COMPLEMENTARY SOLUTIONS
• SYN-PLY® Crossband - a specialty engineered synthetic crossband ideal for 5-ply panel constructions. It offers surface uniformity with no lap lines and is an economical alternative to poplar crossband. Available in a light color, there is no show-through even with light surface finishes.

• LUXCELL® Facer - a specialty engineered wood-fiber veneer with a surface that allows manufacturers the option of painting or printing for unique customization of retail-store fixtures, cabinetry, or individualized office & residential furniture pieces. Easy to use in both 3- and 5-ply panel constructions, LUXCELL can be cut-to-size to minimize waste & reduce costs, and offers the value-added feature of meeting your color and decorating specifications.
