Inspirational

This selection of custom colors represents colors and finishes designed to inspire creativity. These finishes are not stocked inventory items, therefore lead times, custom color fees, and minimum order quantities apply. Don’t see what you’re looking for? Contact your Alucobond® Sales Representative to discuss additional custom color options.

PVDF or Polyvinylidene Fluoride Finish systems are the industry standard for metal architectural coatings. The SRI or Solar Reflectance Index with cool paint technology is a measure of a finish’s ability to reject solar heat, as shown by a small temperature rise. It is defined so that a standard black (reflectance 0.05, emittance 0.90) is zero and a standard white (reflectance 0.80, emittance 0.90) is 100. SRI values are subject to change based on paint supplier and availability. Please contact Customer Service for the most accurate listings as well as stocking of Spectra colors.
FINISH SYSTEMS
Alucobond® Cool Systems are created utilizing a color and an Inspirational PVDF (Polyvinylidene Fluoride) finish system. When requesting a color, we will provide you with the resin type, the number of coats, the color name and the gloss level. Alucobond Spectra colors use high-quality fluorocarbon paint systems applied in a continuous coil-coated process to create a color-shifting surface. Depending on the pigment type and viewing angle, different wave-lengths of light are reflected, resulting in an ever-changing color gradient with iridescent highlights. Now your entryways, columns, and facades can make a bold statement without upsetting your budget.

WARRANTIES
For warranty information please contact your Alucobond representative.

PHYSICAL PROPERTIES
Alucobond Composition
› Aluminum interior and exterior facings in 0.020” nominal thickness to ensure flatness
› Polyethylene (PE) core available in 3mm, 4mm and 6mm nominal thickness
› Proprietary fire-retardant (Plus) core available in 4mm nominal thickness only

Sheet Widths
› Standard coil coated widths include 50” and 62”
› Standard anodized widths include 62”
› Custom width 40”

Sheet Lengths
› Standard lengths include 146” and 196”
› Custom lengths for coil coating up to a maximum of 360”
› Custom lengths for anodized up to a maximum of 216”

Minimum Bending Radius
› The minimum bending radius of Alucobond PE and Alucobond Plus without routing the interior skin is 15 times the thickness of the material

Available Finishes
› PVDF, FEVE
› Polyester
› HDP
› Anodized: Clear, Light Bronze, Medium Bronze, Dark Bronze and Black
› Monochromatics, Micas and Metallics
› naturAL
› Spectra

CUSTOM COLOR
Don’t see what you are looking for? Let your imagination be our guide! The palette of coil-coated colors can be endless. Our color matching experts will work to match your color. Custom colors are available but require a 1,000 sq.ft. minimum order and are subject to set-up charges. Exact matches are sometimes not possible. Matching a color created by a spray method, particularly a metallic, may not match with a color created on a roll coated method.

To ensure that we identify your color correctly, we require either:
A hand sample of at least 1” x 1”, or a Pantone® color reference, which can be noted as a number with a “C” for coated or “U” for uncoated.
Example: Pantone 220C, or a PPG paint code reference.

Send the color sample to:
Alucobond Custom Color Match Department
208 West Fifth Street
Benton, KY 42025

Please provide your name, company name, address, phone number and email address, as well as the project name, project location, type of finish and gloss. We will update the progress of your custom color request via email.
