

PRODUCT CARE INSTRUCTIONS

General Cleaning and Maintenance

For normal everyday cleaning of your MONARC wall panels we suggest using warm water with a mild soap applied with a soft wash cloth or sponge. Be careful not to use any abrasive cleaners or scouring pads as this will dull the surface of your new beautiful MONARC wall solutions.

Do not apply sealers to any MONARC wall panels including the simulated tile and grout patterned walls as the MONARC walls are non-porous and do not require sealing.

Additional products that can be used when warm soapy water and soft cloth or sponge isn't enough are listed below along with those products that should never be used on your new MONARC walls. Always review the individual cleaners manufacturer's instructions.

Always rinse cleaning products thoroughly from wall panels after cleaning.

Recommended Cleaning:

- Use a plastic cleaner or mild detergent (such as Dawn or Palmolive) and water with a soft cloth
- Use soft, clean sponges and cloths for application of cleaners and for washing/rinsing
- Multi-surface cleaning and/or disinfecting solutions can be used, including those available from:
 - 409, 7th Generation, BioClean, Fantastik, Lysol, Method, Microban, Purell, Windex or similar products.
- A dilution of vinegar and water may be used to soften mineral deposits.
- Disinfecting: It is acceptable to use hydrogen peroxide or isopropyl alcohol for disinfecting, or chlorine bleach per manufacturers' recommendation for dilution

Do Not Use

- Wire brushes, steel wool, sandpaper, abrasives, scrapers or other similar cleaning tools which will mechanically abrade the surface
- Any cleaners containing abrasives or grit
- Highly acidic or highly alkaline cleaners intended for lime scale or rust removal.
- Any cleaners with ammonia, or any solvent-based cleaners
- Use of any unapproved products or chemicals may result in a dull surface and/or may result in damaging the surface of the panel or printed imagery. This will void your product warranty.

PRODUCT CARE INSTRUCTIONS

Delivery, Storage, & Handling

Deliver components, MONARC panels, and other manufactured items to the project site in original, unopened packages and store them in a fully enclosed, conditioned space where they are protected against damage from moisture, humidity, temperature extremes, direct sunlight, surface contamination, and other causes. Package panels for protection during transportation and handling.

Unload, store, and erect MONARC panels, components and accessories in a manner to prevent bending, warping, twisting and surface damage.

Stack MONARC panels horizontally on platforms or pallets, covered with suitable weathertight and ventilated covering. To ensure dryness, store panels with a positive slope for drainage of water. Do not store panels in contact with other materials that might cause staining, denting, or other surface damage.

Retain strippable protective covering on MONARC panels during installation.
